

# Product Range

**Swale Blinds**

Swale Blinds has established itself as one of the UK's leading trade only Window Blind suppliers and installers.

We have built our reputation with our unceasing focus on customer service, being one of the only manufacturers to maintain our commitment to delivering all orders within five working days.

Please take a look through our extensive brochure to appreciate just how comprehensive our product offer is.

## Online Ordering

Online ordering will allow our customers to place orders directly with Swale Blinds. There are a number of advantages to this method of placing orders, including elimination of errors, shorter lead times and cutting down on fax costs.

Once an order has been submitted, its status will then be updated to the online system so customers can track the progress of their orders. Order acknowledgements will be emailed out as usual.

The online system will also allow the entry of quotations, so customers can price blinds quickly without having to look up price books and calculate discounts. These quotations can be left on the system until they are ready to be converted to orders.

Please contact customer services for information on how to utilise our online ordering facility.

# Child Safety

From day one, Swale Blinds has positively and passionately supported and upheld, the BBSA's 'Make It Safe' programme. We were the first major manufacturer in the UK to improve and adapt our window blind designs and incorporate the fitting of safety mechanisms – helping to avoid the risk of injuries to vulnerable children. This is a record of which we are justly proud and shows we are constantly striving to develop and improve our product offering.

For your peace of mind we fit as standard either a tensioning device or a safety mechanism. This reduces the risk of a child or vulnerable person becoming entangled in the cord or chain. Where possible loops are replaced with individual cords.

Where necessary, child safety devices are supplied with our blinds as standard and at no additional cost to you the customer.

As a member, we have worked in tandem with the BBSA to enforce their 'make it safe' campaign.

All blinds are supplied with the required warning tag attached to them.

paradise

# Paradise

## Aluminium Venetian Blinds

■ Paradise is a range of over 100 slat colours featuring various finishes and textures.

■ The Paradise range is available in 15mm, 25mm, 35mm and 50mm width slats.

■ All blinds are made with colour co-ordinating head and bottom rails and ladder braid or ladder tape.

■ 25mm blinds are available with either a 'c' shape or enclosed bottom rail.

■ Blinds are available free hanging or tensioned.

■ Various tilt options are available, including wand, cord and uniwand. Blinds can also be made to fit and operate between double glazing.

■ Guidewires are available for blinds fitted to tilt and turn windows.

■ Hold down clips are available for use on blinds fitted to doors.

■ For minimal light explosion and maximum privacy, a 'hidden hole' option is available called the Privacy blind. This is available on 25mm slats only.

■ Motorised tilt option is available with the Equador 51mm x 57mm head rail.

# Palm

## Wooden Venetian Blinds

- Palm is an extensive range of wood slats, featuring traditional and modern finishes.
- The Palm range is available in 50mm width slats.
- All blinds are supplied on a robust, colour co-ordinating head rail system with cord operation.
- All blinds can be made with either co-ordinating or contrasting ladder braid or ladder tape.
- Palm wooden blinds can be supplied with a motorised tilt operation.

palm

# Pacific

## PVC Venetian Blinds

- Pacific is a range of expanded foam PVC slats.
- The Pacific range is available in 50mm width slats.
- All blinds can be made with either co-ordinating or contrasting ladder braid or ladder tape.
- As a PVC product the Pacific blind is particularly suitable for kitchens and bathrooms.
- Pacific is a flame retardant product and as such lends itself to the contract market as well as the domestic market.
- Our Pacific blinds can be supplied with motorised tilt operation.

pacific

# Pleated

## Blinds

■ Widely used as a conservatory product the pleated blind is becoming more commonly seen at a conventional window.

■ Hardware is available in white or brown.

■ All blinds are supplied with Unipleat as standard. This is a system which prevents the pleats from gathering at the bottom of the blind.

■ Blinds can be made free hanging with a cord lock, or tensioned using a bottom rail or locating feet.

■ Shaped pleated blinds can be made with or without an angle side bar.

■ Various fixing aids, such as mounting wedges, mounting strip and 'L' shape profile are available to ensure a quality finish.

■ Vast choice of fabrics to suit all applications.

pleated

# Tri-Shade

## Blinds

- The Tri-Shade is a roller venetian blind.
- In the lowered end position the vanes of the blind can be opened/adjusted. Opening of the vanes is only possible when the fabric is moved to the lower end position.
- An extensive range of contemporary fabrics are available.
- Tri-Shade blinds are supplied on an aluminium head box which is available in white, silver, black, cream and brown.
- Tri-Shade Blinds are available with a sidewinder control.
- The Tri-Shade Blind can be motorised.

tri-shade

duorol

# Duorol

## Roller Blinds

- The Duorol is a 'double roller blind'. Its effect comes from shifting the fabric stripes up and down using a chain operation.
- A range of over 50 contemporary fabrics are available, including a number which are flame retardant.
- Duorol blinds are supplied on an aluminium cassetted head box which is available in white, silver, black, cream or brown,
- The bottom bar is supplied as a two-part bottom rail, but if a more minimalistic look is required, a one piece bottom bar can be requested.
- Duorol blinds are available with a sidewinder control.
- The Duorol blind can be motorised.

# Roller

## Blinds

■ All of our roller blinds can be supplied on 32mm, 40mm or 45mm hardware with either a spring or sidewinder control.

■ Open and closed cassette head boxes are available to cover the roller tube and operating mechanisms. These can be fabric covered depending on the head box.

■ Fabric covered bottom bar, front and back is supplied as standard.

■ Various scallops, poles, finials and braids are available to allow you to enhance the look and feel of your blind.

■ Side guidewires are available.

■ Roller blinds can be motorised.

■ Hundreds of fabrics are available to suit all domestic and contract applications. Ranges include antimicrobial, flame retardant and performance fabrics.

roller

# Senses

## Roller Blinds

■ The Senses is a slow rise cassette roller blind.

■ Senses blind is supplied on a 32mm tube with a spring or sidewinder control.

■ A Senses roller blinds comes with fabric covered fascia as standard.

■ Superior end caps for the fascia and the bottom rail come as standard and give the blind a truly luxurious feel. There is a choice of white, gold, chrome, black chrome or brushed silver.

■ Fabric covered bottom bar, front and back is supplied as standard.

■ Hundreds of fabrics are available to suit all domestic and contract applications. Ranges include antimicrobial, flame retardant and performance fabrics.

senses

cassette

# Cassette

## Blackout Roller Blinds

■ Cassette blackout roller blinds are commonly used in the contract market where maximum light elimination is required.

■ Although predominantly a contract blind this is a very sleek and aesthetically pleasing product that combines functionality and performance with great design and good looks.

■ Blinds can be supplied on white or black hardware with either a chain or crank operation.

■ All of our Cassette blackout roller blinds come with two piece adjustable side channels. These allow the installer to adjust them to achieve a perfect fit.

■ A comprehensive range of blackout fabrics are available to go with this blind, although any fabric may be used if required.

curtains

# Curtains

■ Curtains can be supplied with pencil pleat, pinch pleat or eyelets. Eyelets are available in a variety of colours and finishes.

■ Curtains are supplied with satin lining as standard. Blackout, bonded, bonded blackout and flame retardant linings are also available.

■ We offer over three hundred fabrics, with a choice of plain, patterned and flame retardant finishes.

# Vertical

## Blinds

■ Vertical blinds are available on either the Impala or Vogue head rail systems.

■ All blinds are supplied with equally spaced 89mm or 127mm louvres.

■ The Impala head rail is available in white, silver or brown.

■ The Vogue head rail is available in Ice White, Piano Black, Champagne Gold, Espresso Brown and Brushed Aluminium.

■ Blinds can be operated using a chain and cord or wand on both the Impala and Vogue head rails.

■ Antimicrobial fabrics are available. These are particularly desirable in hospitals, doctor's surgeries and other public areas.

■ We offer a choice of hundreds of fabrics from all of the UK's leading fabric suppliers.

■ We also offer Oasis, a range of contemporary 89mm PVC louvres.

■ Vertical Blinds can be supplied with a motorised tilt and draw operation.

vertical

roman

# Roman

## Blinds

- A luxurious and high quality roman blind supplied on a robust yet sleek head rail with side chain operation.
- Blinds are supplied with bonded blackout lining as standard. Other linings available: satin, blackout satin, bonded and flame retardant.
- Roman blinds can be supplied with or without pelmet and with standard or waterfall stacking.
- We offer a range of over three hundred fabrics, with a wide choice of plains, patterns and flame retardant finishes.

wovenwood

# Woven Wood

## Blinds

- Extensive range of wood and bamboo designs.
- All wood and bamboo has been carefully selected from sustainable forests around the world.
- Blinds can be made tensioned to suit roof windows or free hanging. Free hanging blinds are supplied on a deluxe head rail with a cord lock. Roof blinds are supplied on white or brown pleated hardware.
- Free hanging blinds can be made in the roll up or roman style with a pelmet to conceal the head rail and mechanisms.
- All blinds (except those using Dominica fabric) are supplied with edging tape to complement the natural finish of the blind.

# Panel

## Blinds

■ Panel blinds are particularly well suited to larger windows and patio doors. Panel blinds can also be used as a room divider.

■ Panel blinds can be cord or wand operated. Panels can be drawn to one side or split draw. Choose from 3 to 8 panels depending on the draw and size of your blind.

■ A range of braids and eyelets are available to personalise and accessorise your panel blind.

■ We offer a choice of hundreds of fabrics. Panels can be made in different fabrics to create a unique and contemporary look.

■ Woven wood materials can be used on Panel blinds.

panel

# Parallel

## Blinds

■ A contemporary roman blind that can be made using any of the hundreds of roller fabrics offered by Swale Blinds.

■ Parallel blinds are supplied with Louvolite open cassette head rail with matching or contrasting fabric if required.

■ Blinds are operated with a sidewinder control that can be positioned on the left or the right side.

■ A range of braids and eyelets are available to enable you to create a truly bespoke blind.

neatfit

# Neat Fit

- Desirable range of pleated and honeycomb fabrics along with a range of the uk's most popular aluminium slat colours.
- No screws and no drilling required. No control cords, therefore completely child safe.
- Quick and simple to fit. Easy to operate. Bottom rails feature a unique magnet design to ensure excellent closure.
- Reduces heat loss by up to 63% (honeycomb only – english heritage report 2009).
- Suitable for internally beaded uPVC windows, regardless of bead depth.

intu

# Intu

- The Intu is available as a pleated, aluminium or roller blind.
- Aluminium slats are tilted with a slider at the top of the frame eliminating the need for a wand.
- Blinds are fitted neatly into the window beading without the need for drilling or screwing into the window frame. Blinds can tilt and turn with the window.
- All blinds are tensioned, with no cord loops making it CHILD SAFE.
- Suitable for windows with a bead depth of between 11mm and 27mm.
- Intu hardware is available in white, silver or brown.

# Perfect Fit

- An innovative blind that requires no drilling or screwing. Brackets fit neatly into the beading of the window frame.
- Suitable for windows with a bead depth of 18, 20, 24 or 30mm.
- Perfect Fit is available as a roller, pleated or venetian blind.
- The Perfect Fit frame provides increased privacy and improved light retention.
- Tensioned venetian blinds, pleated blinds and roller blinds are CHILD SAFE as there are no cord loops.
- Perfect Fit frames are available in white, silver (not roller), grey, brown, brown mahogany and golden oak.
- As the frame fits flush against the window frame it provides excellent thermal efficiency. It reduces heat build-up in the summer and retains heat in the winter.

pf

## Perfect Fit International

- A development of the Perfect Fit blind that is designed for conservatory roofs. No drilling or screwing is required in order to fit this style of blind.
- Perfect Fit International is available with pleated blinds only.
- Perfect Fit International frames are available in white or brown.
- Blinds are delivered ready assembled in the frames. On average fitting times are reduced by 50% when compared to fitting standard pleated roof blinds.
